Appreciative Inquiry
Creating Change That Transforms Schools

What do you want your school to accomplish this year?

- Training for School Boards, Staff, and Student Leadership
- 1-2 day Appreciative Inquiry Summits
- Team and Small Group Development
- Resources for Counselors, Teachers, and Administrators
- Evidence Based Approaches
- A More Effective Way to Solve School Problems

Appreciative Inquiry

A proven method of problem solving for school that has the potential to create lasting transformation long into the future. It is the method used to change and improve the culture of staff and students, create community with parents and schools, and improve outcomes in almost any area of performance.

Appreciative Inquiry stops the cycle of identifying problems and then staying in the problem looking for solutions. It begins a 5-D cycle, defining what is right, and building on those strengths to compensate for deficits. It is a unique way to tackle problems without division, dissent, or negative dynamics.

Appreciative Inquiry is the process for implementing bold solutions while finding new strengths and resources and creating a pathway to using them in any department, school, or organizational system.

Appreciative Inquiry has been used to retain staff, improve academic engagement, reverse feelings of negativity, and to create peak performance and opportunity from within.
